

Who Are We?

SSI has been selling Traffic Safety Products in Atlantic Canada since 2008 and has gained a reputation for a high quality, competitively priced product offering. It is our exceptional level of customer service, however, that has been the cornerstone to growing and expanding our business

The increasing frequency that our products are used on Atlantic Canadian highways is a true testament to the hard work we have done.

Why SSI?

Our reputation speaks for itself! At SSI, we establish close relationships with our customers, listening carefully to their needs. We are in constant search of new products to fulfill our customer's needs, allowing us to add significant value and gain a reputation as a key component to customer success. We carry significant levels of inventory at our facility in Debert, Nova Scotia, allowing us in most cases to ship product within 24 hours of receiving customer orders.

Delineator Posts And Bases

Delineator Posts:

Our SSI Premium Series Delineators are made from premium low density polyethylene material for maximum durability, and contain UV stabilizers providing a longer, fade-resistant product life. We carry a variety of different post designs, with posts striped with high intensity prismatic sheeting for excellent visibility.

Delineator Bases:

SSI Delineator bases come in both 12 lb. and 15 lb. sizes, and are made from 100% recycled rubber. The bases are extremely durable in a variety of weather conditions.

Stackable Delineator Posts:

SSI also carries Stackable Delineator posts, made from high quality materials for excellent durability. The bases for these posts come in 16 lb. size.

Rebound Delineator Posts:

SSI's Rebound Delineator Posts are 46" high, and are made from high quality LDPE material. The posts contain UV stabilizers providing excellent fade resistance. Great for use in parking and other situations where post flexibility is desirable.

PART NUMBER	PRODUCT DESCRIPTION	PRODUCT SPECIFICATIONS
20000	T-Top Delineator Post	42"
20107	Grab Handle Delineator Post	42"
20228	D-Top Delineator Post	42"

20230	Stackable Delineator Post	42"
20231	Stackable Delineator Base	16 lbs
20224	Rebound Delineator Post	46"

Traffic Cones and Accessories

Traffic Cones:

Our SSI Premium Series Traffic Cones come in 12", 18", and 28" heights, and are made from premium PVC material. These cones have an injected interlocking base that is extremely durable, reducing the possibility of base separation.

The PVC material formulation contains UV stabilizers to provide a longer, fade-resistant product life, and are specially formulated for improved performance during the winter months. A variety of High Intensity Prismatic striping options are available.

Traffic Cone Tape:

Our SSI Traffic Cone Tape packages allow for replacement of damaged striping on traffic cones, or to convert cones between a one stripe or two stripe traffic cone design. The tape meets high intensity prismatic, Type III reflective tape specifications.

Cone Bars:

Our SSI Retractable Cone Bars are made from high grade materials, and contain UV stabilizers to improve resistance from fading. These cones bars come in a short (4'-7') length, or a longer (6'-10') length.

Cone Top Lights:

Our SSI Cone Top Lights are 3 Volt, and come in four different colours. These lights are ideal for temporary lighting using existing traffic cones. All Cone Top Lights have foam sleeves for improved fit, and come with batteries included.

PART NUMBER	PRODUCT DESCRIPTION	PRODUCT SPECIFICATIONS
20033	Traffic Cone, No Striping	12"
20131	Traffic Cone, No Striping	18"

20069	Cone Top Light, White Lens	3V

Traffic Barrels

Traffic Barrels:

Our SSI Premium Series Traffic Barrels are manufactured out of high quality low density and high density polyethylene material which contain UV stabilizers providing a longer, fade-resistant product life. Both the 36" and 44" barrels come complete with moulded grab handles and high intensity prismatic reflective striping.

Barrel Base:

The Barrel Base for the 36" barrel is an 18 lb. base, and is made from 100% recycled rubber. The 44" barrels utilize a standard tire ring base, with a weight of 24 lbs.

Barrel Tape:

SSI also carries High Intensity Prismatic Type III reflective tape, in both 4" and 6" widths, that can be used to replace tape on existing barrels, or to reconfigure the traffic barrels to a different striping pattern. The tape comes in both white and orange, and the rolls are 50 yds. in length.

PART NUMBER	PRODUCT DESCRIPTION	PRODUCT SPECIFICATIONS
20005	Traffic Barrel	36"
20056	Traffic Barrel	44"
20004	Barrel Base	18 lbs
20016	Tire Ring Base	24 lbs

20050	Flexible Barrel Tape, White	4"
20202	Flexible Barrel Tape, Orange	6"
20193	Flexible Barrel Tape, White	6"

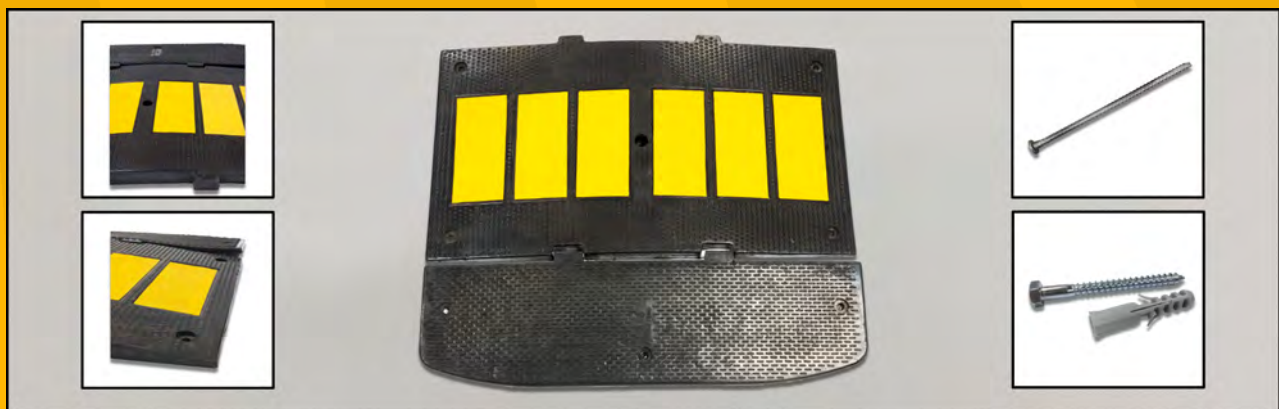

Parking Products

Speed Bumps and Humps:

SSI introduced modular Speed Bumps and Humps to the market over the past couple of years. These products, manufactured from black rubber with bright yellow reflective highlights, provides great visibility in all types of weather conditions. The modular nature of the product provides easier handling and storage, as well as allows for customized lengths, based on individual customer needs. Both Bumps and Humps have the same maximum height off the ground, with the Hump spreading the impact over a wider area, resulting in a gentler impact on vehicles.

Parking Curbs:

SSI's Parking Curbs have similar reflective benefits to the Speed Bumps and Humps, as they are made from similar materials, with the solid black rubber highlighted by the bright yellow reflective material for maximum visibility. Our Parking Curbs come in 6 ft. lengths.

PART NUMBER	PRODUCT DESCRIPTION	PRODUCT SPECIFICATIONS
Custom	Modular Speed Bump	Varies
Custom	Modular Speed Hump	Varies
20038	Parking Curb	6'
20075	Speed Bump/Hump Accessories Set	Bolt and Sleeve

Road Marking

Temporary Road Markers:

SSI's Temporary Road Markers are manufactured from high quality materials, and are extremely durable in a variety of weather conditions. These markers come in both white and yellow, and include high intensity reflective striping on both sides.

Pavement Marking Tape:

SSI's Pavement Marking Tape is a premium quality product, designed for excellent conformability, and manufactured from highly reflective materials providing excellent nighttime delineation in a variety of weather conditions. Our Pavement Marking Tape comes in both white and yellow.

PART NUMBER	PRODUCT DESCRIPTION	PRODUCT SPECIFICATIONS
20030	Temporary Road Markers	Yellow
20031	Temporary Road Markers	White
20082	Pavement Marking Tape, Construction Grade	Yellow
20083	Pavement Marking Tape, Construction Grade	White

Sign Stands, Posts, and Accessories

Sign Stands:

At SSI, we offer a variety of sign stand options, designed to accommodate roll-up, aluminum, medium density overlay, plywood, plastic and laminate signage. The stands come in single spring, dual spring, or tripod models. The spring models are designed for high stability and resistance to wind gusts.

Sign Posts and Mounting Hardware:

SSI carries significant inventory of sign posts, bases, and associated mounting hardware for a variety of sign installation options. This allows our sign shop to be a "one stop shop" for customers purchasing signs by providing a complete solution including all items required for installation.

PART NUMBER	PRODUCT DESCRIPTION	PRODUCT SPECIFICATIONS
20032	Tripod Sign Stand	Lightweight

Road Signs

Custom Signage

SSI manufactures a complete line of construction, regulatory, and warning signs at our manufacturing facility in Debert, Nova Scotia. These signs come manufactured on either high quality medium density overlay material, or on aluminum sign blanks. Other materials can also be used for special signage applications. We also carry a full line of Roll Up Signs.

SSI uses high quality reflective sheeting and vinyl, resulting in signs that look great and are extremely durable. Due to the custom nature of sign manufacturing and the wide variety of customer applications, pricing is quoted based on each unique customer request.

20179	Sheeting, High Intensity Prismatic	Yellow, 36" x 50 yds

Barricades and Accessories

A-Frame Barricades:

Our lightweight A-Frame Barricades are made from high quality plastic materials and are lightweight for easy relocation in crowd control situations. The legs can also be filled with sand for greater stability. The A-Frames come with 6', 8', or 10' boards, and have High Intensity Prismatic Striping on both sides.

Type II Barricades:

Our Type II barricades are made of all plastic to eliminate rust and no painting is required. The solid wall design is molded in one piece for high impact resistance. The barricades are designed for easy installation of barricade lights.

Lo-Pro Airport Barricades:

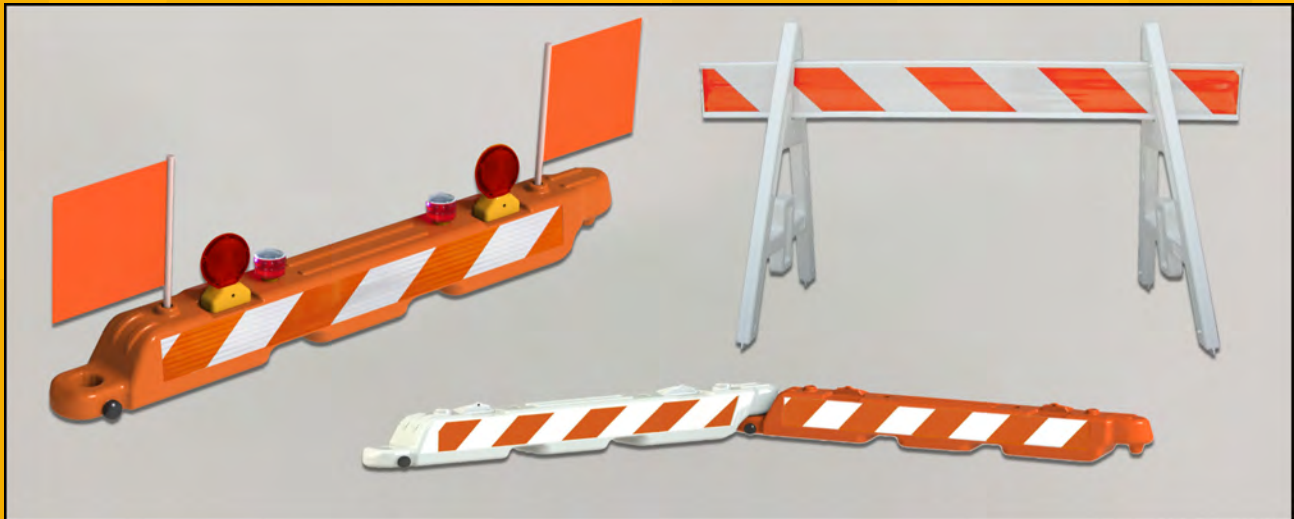

Our Lo-Pro Airport Barricades are molded with reinforcing ribs for improved strength. The barricade design with connectors molded into the barricade allows for interlocking connection, with no pins to lose. Lo-Pro barricades come in two colours with high intensity prismatic striping, and accept two types of barricade lights.

360 Degree Red Solar Lights:

Our 360 Solar Lights meet airport industry specifications and come in either steady burn or flashing.

Barricade Lights:

Our SSI LED Standard Barricade Lights come powered with a 3V or 6V power supply, and can be set to either flashing or steady burn. The barricade lights are equipped with hardware for easy mounting and come with either a Red or Amber lens.
